Software developer with over 2 years of experience specializing in crafting responsive, high-quality user interfaces for web and cross-platform mobile applications and eager to continuously improve my skills and learn more about new frameworks and technologies.

PROFESSIONAL EXPERIENCE

Frontend Developer @ NeoLabs

09/2025 - Current

- Built and deployed responsive web and mobile interfaces using React, Next.js, React Native and Flutter improving performance and UI consistency.
- Integrated RESTful APIs and implemented navigation, authentication, and data-driven components to enhance app interactivity and reliability.
- Collaborated with designers and backend engineers in an Agile Environment delivering high-quality features through Vercel, and Expo pipelines.

Frontend Developer @ Jodna Technologies

07/2025 - Current

- Developed and maintained full-featured web and mobile apps with React, Vue, React Native and Flutter, achieving smooth cross-platform experiences and improved end-user experience.
- Translated Figma designs into reusable components with Tailwind CSS and ensures brand consistency.
- Optimized performance, debugging, and deployment processes to improve stability and user satisfaction across platforms.
